How to make your own Hope for Justice Swallow

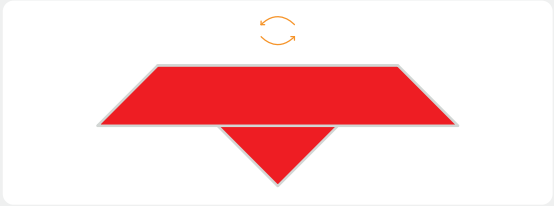

The bird in Hope for Justice's logo represents freedom for those we help and the energy and purpose that our growing global movement brings to the cause of ending modern slavery. It is a swallow, which returns to its nesting place – just as we want to help survivors return to their families.

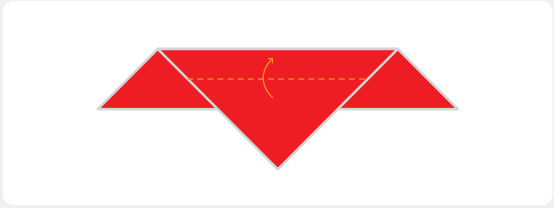

Step 1: Start with a square piece of origami paper. Fold the paper in half by folding the top corner to the bottom corner.

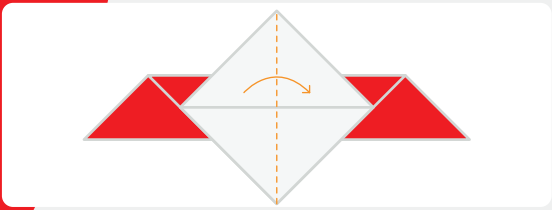

Step 2: You should have an upside-down triangle. Fold part of the top down so that the edge is about halfway down. Don't make this flap too thin because this will become the wings.

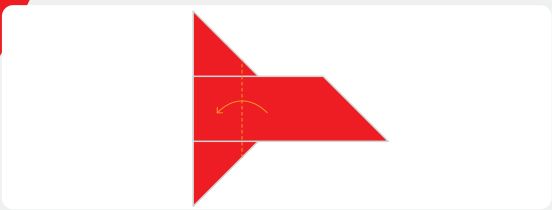

Step 3: Turn the paper over.

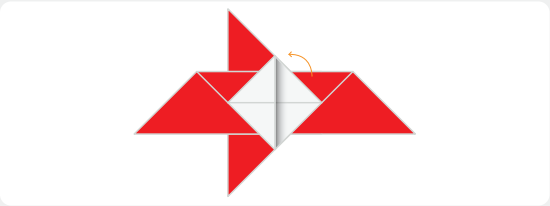

Step 4: Take the bottom corner of the top layer and fold it up like this.

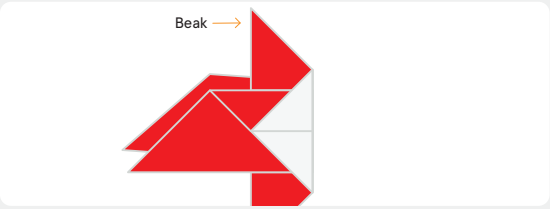

Step 5: Fold the figure in half by folding the left side over to the right.

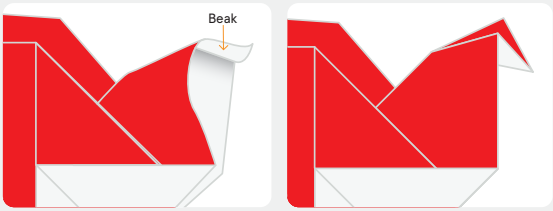

Step 6: Now fold that same flap back like this to make one of the wings.

Step 7: Fold the other wing back also.

Step 8: Now rotate the model clockwise until it looks like the Hope for Justice swallow. The next step is shown zoomed in.

Step 9: Push the centre of the head in and flatten. This is called an inside reverse fold.

Step 10: And voila! You have created your own Swallow. Now it's time to set it free!

Don't forget to share a photo of your swallow on social media and tag us to join us in the fight to end modern slavery.
